Ans to the Qno - 1

page 1

Not everyone gets a chance to study in a public institutions for higher studies and therefore they have to get admitted to a private university. Some also chose private university for their own comfort, provided they have financial affordability. For example, students from English medium OPT for private universities because of admission test is not solely based on their HSE syllabus. Other might refer private universities because it is closer to their residence despite many reasons for attending a private university.

The ~~immedi~~ immediate thought that occurs to people is that only the students who are more ~~yes~~ choose to study in private university. There is a common notion that only the elite go to private university as they can afford it.
