BTHM, Department.

Ans to the query: No: ③

there are about the local planning and development :-

About the planning which guides development in the

borough and sets out how

housing need will be met:

bellow of local development

planning :-

\* guides development within

the borough.

(p.t.c) ①

\* sets out the long term  
future for the borough

\* outlines how well ensure  
that growth is delivered  
in the right places

\* guides how the growth  
will take into account the  
needs of our local communi-  
cation.

The government is clear  
that the local authorities  
must have an

(0.1.9)

(p.1.10) ②

date plan to guide development.

The plans and policies that they make up the local Development plan are:

\* the local plan (This plan includes two policies: the Core Strategy, and the Site Allocation and development management policies plan.

\* any completed neighbourhood plans.

(P. 1. 1. 1)

(P. 1. 1. 1) 3)

\* The Norfolk County Council  
Mineral a waste plan.

\* we listened to the Comm-  
unity while we were  
creating the local plan.

(p. 4)

Ans to the querz no: (5)

global environment; it can

be explained as the environment found in any self-governing state that organization that impacts the decision making capabilities of such an organization and resource utilization matrix.

there are two types of global environment

(p.t.o) (5)

are as follows:-

\* General environment

\* task environment.

\* General environment:

\* Political

\* Economical

\* Sociocultural

\* Technological

\* Environmental

\* Legal

\* political: The factors either increases opportunities or registers threats to the progress of organizations.

\* Economical: most of the economic factors for instance in Apple, have been sources of opportunity and growth.

\* sociocultural: socio-cultural trends affect businesses due to influences from

(p.d.o)

consumer behaviors and expectations.

\* Technological: - Intriguing technology and funding levels to research potential ever competitive cutting edge technologies are technological opportunities for businesses, etc.

(p.t.o) 8

## #2) Task environment: -

\* competitors.

\* Suppliers.

\* Government regulations.

\* Consumers.

\* Special interest group.

\* Labor force.

explain:

\* competitors: competition

from an alternative product

(p+o)⑨

provided effect the business  
ability to get maximum  
sales in a given market.

\* Suppliers: - They are  
essential in linking production  
companies with the ultimate  
product delivery system

\* Government regulation:  
Economic policies and  
market policies often  
(p.t.o) (10)

imposed by the government  
can influence business  
operations.

\* Labor force : Increased

demand for goods and  
services from a company  
calls for increased  
output to meet the  
demand.

(p.t.0) (M)

Ans to the quer: No: 06

there are 4 major global environment problems followed

there: -

① Air pollution.

② water pollution.

③ Climate change.

④ ~~global~~ global warming

① Air pollution - pollution

of air, water, and soil

(P.T.O) ②

takes a huge number of years to recover. Industry and engine vehicles fumes are the most obvious toxins. Substantial metals, nitrates, and plastic are poisons in change of pollution.

② water pollution :- Clean

water drinking is turning into an uncommon thing.

(0.1.4)

(P.t.d) 13

water is turning into a  
monetary and political concern.  
as the human populace

battles for this need, waste  
from industrial and agricultural  
activities pollute the  
water that is used by  
humans, animals and plants.

③ climate change climate  
change is yet another

(+1.4)

(0.4.0) ①④

environmental concern that  
has surfaced in the last  
couple of decades. Environ-  
mental change has ~~decades~~  
different destructive impact  
that include, but are not  
limited to, the melting of  
polar ice, change in seasons,  
new sicknesses, and change  
in the general climate  
situation.

(putao) 15

④ Global warming : Environmental asset abuse is also an important environmental concern. Fossil fuel utilization brings about the discharge of greenhouse gasses, which causes environmental change.

However, Individuals are taking endeavors to move

(part 1) ⑥

to renewable energy sources.

Ans to all the ques: No: - ①

global environment effect tourism

The environment effect of tourists, and their use of facilities, can result in environmental pollution through

an increased number of people. AS well as air

(P. 17)  
(P. 10)

pollution from an increase  
in the use of fossil  
fuels, pollution of the land  
and sea swells in tourist  
areas and in tourist  
seasons.

there are ~~two~~  
two main ways that  
tourism negatively impacts on  
the environment:

\* through the

(p. 10) 18

development of the area.

\* Through the behaviour of  
tourists,

such infrastructure development  
might impact biodiversity and  
ecological habitats, damage original  
visual resources, and weaken  
the destination's regional  
resilience to natural

(p. 10)

(p. 10) 19

disasters in extreme  
weather conditions, which  
in turn may result  
in negative phenomena

such as soil erosion  
and landslides. The negative  
impacts also include the  
overuse of water resources  
and deforestation.

(p.t.o) (20)

☐ The behaviour of tourists, and their use of facilities can result in environmental pollution through as increased number of people. As well as air pollution from an increase in the use of fossil fuels, pollution of the land and sea swells in tourist areas and in
