SEMESTER: FALL 2023

SUBMITTED BY: EASHA MONI

PROGRAM: BTHM

STUDENT ID: 1522550021

BATCH: 55 TH

SUBMITTED TO: FARIA TANZILA (Lecturer)

Section A

Books are, by far, the most lasting product of human effort. Temples crumble into ruin. pictures and statues decay, but books survive. Time does not destroy the great thoughts which are as fresh today as when they first passed through their author's mind. These thoughts speak to us through the printed page. The only effect of time has been to throw out of currency the bad products. Nothing in literature which is not good can live for long. Good books have always helped man in various spheres of life. No wonder that the world keeps its books with great care.

1. Of the products of human effort, books are the most
(A) important (B) enjoyable (C) permanent (D) useful

Ans: C) permanent

2. Time does not destroy books because they contain (A) subject matter for education (B) useful material (C) high ideals (D) great ideas

Ans: D) grate ideas

3. "To throw out of currency" means
(A) put out of use (B) extinguish (C) forget (D) destroy

Ans: A) put out of use

4. The world keeps its books with care because
(A) they educate us (B) they bring great ideas to us (C) they help us in various spheres of life (D) they make us successful

Ans: C) They help us in various spheres of life

SECTION-B

Question

write a paragraph on following topic in 150 words

" suppose you are a fictional character of book, who has a power to save people from any man-made disaster. now write a paragraph describing the name of the character and the power of the character. also describe how do you save people with your power."

Answer

In the realm of literature resides a character known as Namir, a guardian endowed with the extraordinary ability to avert man-made disasters. With an innate understanding of impending chaos, Namir harnesses the power to manipulate probabilities, foreseeing calamities before they unfold. This character stands as a beacon of hope, intervening in moments of perilous human-made crises. Utilizing foresight and agility, Namir swiftly navigates through the shadows of imminent danger, orchestrating interventions to neutralize the disaster's impact. Whether it's redirecting the path of destructive forces or empowering minds with solutions, Namir operates with strategic precision. From averting technological catastrophes to diffusing societal unrest, this character embodies resilience and strategic finesse, emerging as a guiding force, saving lives and restoring hope amidst the turbulent landscapes woven within the pages of the narrative.

Question

Write an argumentative essay on following topic and take a particular side to give your logical argument.

" The schools should limit the use of computers and other technology for students"

Answer

Limiting the use of computers and technology within schools is a contentious topic, sparking debates about the impact of these tools on student learning. While technology undoubtedly offers vast resources and avenues for educational advancement, there's a compelling case to be made for imposing limits on their use among students. Advocating for controlled usage of computers and technology in schools allows for a more balanced and holistic approach to education.

Firstly, excessive screen time has been linked to various health concerns among students, including eye strain, disrupted sleep patterns, and a sedentary lifestyle. By imposing limitations, schools can prioritize physical health and promote alternative activities that encourage movement and social interaction.

Secondly, an over-reliance on technology might hinder the development of crucial interpersonal and critical thinking skills. Students heavily dependent on technology may struggle with face-to-face communication, problem-solving, and creative thinking. By restricting technology use, educators can encourage students to engage in activities that foster these essential skills, such as group discussions, hands-on projects, and debates.

Additionally, the overwhelming presence of technology can be a distraction, leading to decreased attention spans and reduced focus on academic tasks. Setting boundaries on technology usage allows students to concentrate better during classes, leading to improved learning outcomes and retention of information.

However, it's essential to acknowledge the undeniable benefits of technology in education. When used thoughtfully and purposefully, computers and technology can enhance learning experiences, provide access to a wealth of information, and facilitate interactive and personalized learning.

In conclusion, while technology undoubtedly plays a vital role in modern education, schools should consider implementing limitations on its use among students. Balancing technological advancements with traditional teaching methods can create a more well-rounded educational experience, prioritizing not only academic growth but also holistic development encompassing physical health, critical thinking, and social skills. The judicious use of technology can indeed be a powerful tool for learning, but moderation and a balanced approach remain crucial for ensuring students' overall well-being and comprehensive growth.
