

VICTORIA UNIVERSITY BANGLADESH

Assignment On

Course Name : Differential Calculus & Coordinate Geometry

Course code : MAT-115

Submitted By

Name: Md. Abir Hossain

Reg: 2219150051

Batch: 15th

Program: B.sc in CSE

Submitted To

Umme Khadiza Tithi

Department of CSE/CSIT

Lecturer Victoria University Of Bangladesh

Ans. to the Q. NO- 1

$$\textcircled{1} \lim_{x \rightarrow 0} \frac{\sqrt{1+x}-1}{x}$$

$$= \lim_{x \rightarrow 0} \frac{\frac{d}{dx} \sqrt{1+x} - 0}{1} \quad [\text{L' Hospital rule}]$$

$$= \lim_{x \rightarrow 0} \frac{1}{2\sqrt{1+x}}$$

$$= \frac{1}{2\sqrt{1+0}} \text{ Ans.}$$

Ans. to the Q. NO- 2

$$\textcircled{2} f(x) = x^3 + 5x^2$$

$$\therefore \frac{d}{dx} [f(x)] = \frac{d}{dx} (x^3 + 5x^2)$$

$$= 3x^2 + 5 \cdot 2x$$

$$= 3x^2 + 10x \text{ Ans.}$$

Ans. to the Q. NO-3

$$\begin{aligned} \textcircled{B} \int (2e^x + \frac{6}{x} + \ln 2) dx \\ = \int (2e^x + \frac{6}{x} + \ln 2) dx \\ = 2e^x + 6 \cdot \ln x + x \ln 2 + c \text{ Ans.} \end{aligned}$$

Ans. to the Q. NO-4

$$\begin{aligned} \textcircled{Q} f(x) &= x^2 \sin x \\ \therefore f'(x) &= \frac{d}{dx} [x^2 \sin x] \\ &= x^2 \frac{d}{dx} (\sin x) + \sin x \frac{d}{dx} (x^2) \\ &= x^2 \cos x + \sin x \cdot 2x \\ &= x(x \cos x + 2 \sin x) \text{ Ans.} \end{aligned}$$
